

## ZNF621 抗原（重组蛋白）

中文名称： ZNF621 抗原（重组蛋白）

英文名称： ZNF621 Antigen (Recombinant Protein)

别名： zinc finger protein 621

储存： 冷冻（-20℃）

相关类别： 抗原

### 概述

Fusion protein corresponding to a region derived from 240-439 amino acids of human ZNF621

### 技术规格

<b>Full name:</b>	zinc finger protein 621
<b>Swissprot:</b>	Q6ZSS3
<b>Gene Accession:</b>	BC113415
<b>Purity:</b>	>85%, as determined by Coomassie blue stained SD S-PAGE
<b>Expression system:</b>	Escherichia coli
<b>Tags:</b>	His tag C-Terminus, GST tag N-Terminus
<b>Background:</b>	As a member of the krueppel C2H2-type zinc-finger protein family, ZNF621 (Zinc finger protein 621) is a 439 amino acid nuclear protein that contains one KR AB domain and seven C2H2-type zinc fingers. The gene encoding ZNF621 maps to human chromosome 3, which is made up of about 214 million bases encoding over 1,100 genes, including a chemokine receptor (CKR) gene cluster and a variety of human cancer-related gene loci. Marfan Syndrome, porphyria, vo

n Hippel-Lindau syndrome, osteogenesis imperfecta and Charcot-Marie-Tooth Disease are a few of the numerous genetic diseases associated with chromosome 3. There are two isoforms of ZNF621 that are produced as a result of alternative splicing events.
