

兔抗 GJB1 多克隆抗体

中文名称：兔抗 GJB1 多克隆抗体

英文名称：Anti-GJB1 rabbit polyclonal antibody

别名：CMTX; CX32; CMTX1

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：GJB1

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	This gene encodes a member of the gap junction protein family. The gap junction proteins are membrane-spanning proteins that assemble to form gap junction channels that facilitate the transfer of ions and small molecules between cells. According to sequence similarities at the nucleotide and amino acid levels, the gap junction proteins are divided into two categories, alpha and beta. Mutations in this gene cause X-linked Charcot-Marie-Tooth disease, an inherited peripheral neuropathy. Alternatively spliced transcript variants encoding the same protein have been found for this gene.
Applications:	ELISA, IHC
Name of antibody:	GJB1
Immunogen:	Synthetic peptide of human GJB1

Full name:	gap junction protein, beta 1, 32kDa
Synonyms :	CMTX; CX32; CMTX1
SwissProt:	P08034
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human lung cancer
IHC Recommend dilution:	25-100
