

兔抗 LAMA2 多克隆抗体

中文名称:	兔抗 LAMA2 多克隆抗体
英文名称:	Anti-LAMA2 rabbit polyclonal antibody
别名:	LAMM
抗原:	LAMA2
储存:	冷冻 (-20℃) 避光
宿主:	Rabbit
反应种属:	Human Mouse
相关类别:	一抗
标记物:	Unconjugate
克隆类型:	Unconjugate

技术规格

Background:	Laminin, an extracellular protein, is a major component of the basement membrane. It is thought to mediate the attachment, migration, and organization of cells into tissues during embryonic development by interacting with other extracellular matrix components. It is composed of three subunits, alpha, beta, and gamma, which are bound to each other by disulfide bonds into a cross-shaped molecule. This gene encodes the alpha 2 chain, which constitutes one of the subunits of laminin 2 (merosin) and laminin 4 (s-merosin). Mutations in this gene have been identified as the cause of congenital merosin-deficient muscular dystrophy. Two transcript variants encoding different proteins have been found for this gene.
Applications:	IHC, IF

Name of antibody:	LAMA2
Immunogen:	Synthesized peptide derived from internal of human LAMA2.
Full name:	laminin, alpha 2
Synonyms :	LAMM
SwissProt:	P24043
IHC positive control:	Human placenta tissue
IHC Recommend dilution:	50-100
IF positive control:	NIH/3T3 cells
IF Recommend dilution:	100-500
