

## PVALB 抗原(重组蛋白)

中文名称: PVALB 抗原(重组蛋白)

英文名称: PVALB Antigen (Recombinant Protein)

别 名: D22S749

储 存: 冷冻(-20℃)

相关类别: 抗原

概述

Fusion protein corresponding to a region derived from 2-110 amino acids of human PVALB

## 技术规格

| Full name:         | parvalbumin  |
|--------------------|--|
| Synonyms:          | D22S749  |
| Swissprot:         | P20472   |
| Gene Accession:    | BC069300   |
| Purity:            | >85%, as determined by Coomassie blue stained SDS-PAGE   |
| Expression system: | Escherichia coli   |
| Tags:              | His tag C-Terminus, GST tag N-Terminus   |
| Background:        | Parvalbumin is a calcium-binding albumin protein with low molec ular weight (typically 9-11 kDa). It has three EF hand motifs and i s structurally related to calmodulin and troponin C. Parvalbumin i s localised in fast-contracting muscles, where its levels are highest , and in the brain and some endocrine tissues. Parvalbumin is a s mall, stable protein containing EF-hand type calcium binding sites . It is involved in calcium signaling. Typically, this protein is broke n into three domains, domains AB, CD and EF, each individually c ontaining a helix-loop-helix motif. |
