

## PRKCE 抗原（重组蛋白）

中文名称：PRKCE 抗原（重组蛋白）

英文名称：PRKCE Antigen (Recombinant Protein)

别名：PKCE; nPKC-epsilon

储存：冷冻（-20℃）

相关类别：抗原

概述：

Fusion protein corresponding to N terminal 250 amino acids of human PRKCE

技术规格：

<b>Full name:</b>	protein kinase C, epsilon
<b>Synonyms:</b>	PKCE; nPKC-epsilon
<b>Swissprot:</b>	Q02156
<b>Gene Accession:</b>	BC109033
<b>Purity:</b>	>85%, as determined by Coomassie blue stained SDS-PAGE
<b>Expression system:</b>	Escherichia coli
<b>Tags:</b>	His tag C-Terminus, GST tag N-Terminus
<b>Background:</b>	Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members.
