

兔抗 RPS15 多克隆抗体

中文名称：兔抗 RPS15 多克隆抗体

英文名称：Anti-RPS15 rabbit polyclonal antibody

别名：RIG; S15

相关类别：一抗

抗原：RPS15

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 40S subunit. The protein belongs to the S19P family of ribosomal proteins. It is located in the cytoplasm. This gene has been found to be activated in various tumors, such as insulinomas, esophageal cancers, and colon cancers. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed throughout the genome. Alternative splicing results in multiple transcript variants.

Applications:	ELISA, IHC
Name of antibody:	RPS15
Immunogen:	Full length fusion protein
Full name:	ribosomal protein S15
Synonyms :	RIG; S15
SwissProt:	P62841
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human liver cancer
IHC Recommend dilution:	20-100
