

## 兔抗 GNAO1 多克隆抗体

中文名称：兔抗 GNAO1 多克隆抗体

英文名称：Anti-GNAO1 rabbit polyclonal antibody

别名：GNAO; EIEE17; G-ALPHA-o

相关类别：一抗

克隆类型：rabbit polyclonal

抗原：GNAO1

储存：冷冻（-20℃）避光

宿主：Rabbit

反应种属：Human, Mouse, Rat

标记物：Unconjugate

### 技术规格

|                              |                                                                                                                                                                                                     |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Background:</b>           | Guanine nucleotide-binding proteins (G proteins) are involved as modulators or transducers in various transmembrane signaling systems. The G(o) protein function is not clear. Stimulated by RGS14. |
| <b>Applications:</b>         | WB, IHC                                                                                                                                                                                             |
| <b>Name of antibody:</b>     | GNAO1                                                                                                                                                                                               |
| <b>Immunogen:</b>            | Fusion protein of human GNAO1                                                                                                                                                                       |
| <b>Full name:</b>            | guanine nucleotide binding protein (G protein), alpha activating activity polypeptide O                                                                                                             |
| <b>Synonyms :</b>            | GNAO; EIEE17; G-ALPHA-o                                                                                                                                                                             |
| <b>SwissProt:</b>            | P09471                                                                                                                                                                                              |
| <b>IHC positive control:</b> | Human brain                                                                                                                                                                                         |

|                          |                                                            |
|--------------------------|------------------------------------------------------------|
| IHC Recommend dilution:  | 25-100                                                     |
| WB Predicted band size:  | 40 kDa                                                     |
| WB Positive control:     | Mouse brain tissue, hela cell and human fetal brain tissue |
| WB Recommended dilution: | 500-2000                                                   |
